.....  
Hi Liz- I'll have to dig around for the log-in. However, I got my login after I sent them a short email explaining that I was using it for FWS-- they gave me one no problem. I think they have a pretty loose definition, and if FWS fits in it, I'm sure that EPA does, too. As I recall they got back with me in a matter of hours.

Hi Chris,

My name is Liz Fagen and I am one of two RPMs working on the Upper Animas Site in Silverton, CO. Dan Wall forwarded me your message regarding Earth Point. We are working on identifying ownership for areas that we are collecting investigative samples from for evaluation of eco risk and to feed into a remedial investigation.

Do you have a log-in you'd be willing to share? I'm not sure EPA falls into their definition of "non-profit government".

Thank you for your assistance.

Liz

Hi all- just wanted to let you know about a handy Google earth utility that I just found—Earth Point. Among other things, it will allow you to download a layer into Google Earth that shows townships and ranges—very handy (esp. in the west) to locate real estate parcels, etc. Public agencies can get a subscription for free.

FYI and go to the Earthpoint website for more details.

Have a good week!

Chris

Hello,

I am glad to help. You have a one-year subscription to Earth Point.

If you are using the Excel to Google Earth utility to map a list of coordinates, or the Batch Convert utility to convert them, I am happy to look at your first spreadsheets to ensure that you get the best possible map.

Please let me know if I may be of further assistance.

Good luck with all of your projects.
